# INTRODUCTION

On Track Simulation's Midland Main Line: Modern Passenger Operations Scenario Pack (2018-2019) features 15 engaging scenarios for Just Trains' popular route series for Train Simulator Classic.

This gameplay pack provides an additional 15+ hours of drive time, covering all corners of the route. Take control of a variety of classes such as: 43, 150/2, 156, 158, 170, 185 and 222. This package features a wide variety of services from core Train Operating Companies (TOCs): CrossCountry, East Midlands Trains/Railway, Northern and TransPennine Express.

To ensure realism throughout, all the included scenarios have been created using real timetable documentation, reference photos and stock books.

## Notes

- IMPORTANT! All the Just Trains [Midland Main Line](#) routes required for this Scenario Pack must be updated to the latest versions for the included scenarios to function correctly. (The routes were last updated on 1 August 2025.)
- Sometimes the Class 222 does not display the destination blinds correctly; this is a recent TS Classic core bug.
- If there is an AI service not displaying a destination, chances are that the correct destination was not available to use and therefore a blank screen is shown.

## Train Simulator requirements

If you purchased Train Simulator after 20 September 2012 you will require the European Loco & Asset Pack (available to purchase via [Steam](#)) for some scenarios to work.

## Run in 64-bit mode!

We strongly advise you to run Train Simulator in 64-bit mode to enhance its stability:

1. Run the Steam client and select 'Games' from the top menu.
2. Select 'Train Simulator' from the left-side menu and press the blue 'PLAY' button in the top centre of the window. The option to 'Play Train Simulator' or 'Play Train Simulator 64-bit Edition' will pop up.
3. Select the 64-bit option and press 'Play'.

# INSTALLATION, UPDATES AND SUPPORT

You can install this add-on as often as you like on the same computer system. To re-download the software:

1. Log in to your [Account](#) on the Just Trains website.
2. Click on the 'Your Orders' button.
3. A list of your purchases will appear and you can then re-download the software you require.

## Uninstalling

To uninstall this product from your system, select the appropriate option for your version of Windows from the Control Panel:

- 'Add or Remove Programs' (Windows XP)
- 'Programs and Features' (Windows Vista or 7)
- 'Apps & features' (Windows 10 or later)

Choose the product you want to uninstall and then select the 'Uninstall' option; follow the on-screen instructions to uninstall the software.

*Uninstalling or deleting this software in any other way may cause problems when using this product in the future or with your Windows set-up.*

## Updates and Technical Support

For technical support (in English) please visit the [Support](#) pages on the Just Trains website.

As a Just Trains customer you can obtain free technical support for any Just Trains product.

If an update becomes available for this software, we will post details on the Support page and will also send a notification email about it to all buyers who are currently subscribed to our emails.

## Regular News

To get all the latest news about Just Trains products, special offers and projects in development, [sign up](#) for our regular emails.

We can assure you that none of your details will ever be sold or passed on to any third party and you can, of course, unsubscribe from this service at any time.

You can also keep up to date with Just Trains via [Facebook](#) and [X](#).

# SCENARIOS

## Important – filters

In the 'Drive' menu there are various locomotive and route filter options along the top of the right side. We strongly recommend that these are all set to 'None' unless you are experienced in using them.

**If you set a filter and forget to remove it, there is a strong possibility that not all the available locomotives and/or routes will be displayed in the menu.**

## Choosing a scenario

When you first start Train Simulator, select the 'Drive' option in the Main Menu, then choose the Standard scenarios.

Use the scroll bar on the right side to scroll down to 'Just Trains – Midland Main Line'.

You can now choose your scenario and click on the 'Go' button.

## Add-on requirements

The add-on requirements for each scenario are listed in its description but a full list of the add-ons required to operate all the scenarios is provided below.
